Screen profile

Description

This slip joint gently connects the drive cable with 19 mm aluminium tubes in shading systems. In this model the slipping clutch is realized via a slip joint technique, which protect the drive cable.

This technique is especially suitable for greenhouses, where heat can cause stretching of their constructive components, for example, aluminium rain pipes.

We deliver the slip joint including bolts, nuts as well as spring and cover plate for 19 mm tubes.

Created at 14.03.2025.
