430

525

Description

Transparent energy saving fabric with a shading value of appr. 15% and an energy saving of appr. 45%. It is particularly suitable for greenhouses with a high energy consumption.

The fabric is used in a greenhouse as a transparent screen to reduce heating costs. For this, it remains closed at low outdoor temperatures.

Due to woven acrylic yarns, a good moisture exchange is ensured.

The fabric meets the B1 heavy-flammability guidelines for the European market.

Created at 14.03.2025.

* Our offers are directed exclusively to companies. We do not conclude contracts with consumers. All prices excl. VAT plus shipping costs and possible delivery charges, if not stated otherwise.

For suspended system reinforcement ribbon with hook installation is possible.

Note:

Further processing such as cutting and sewing is not included the price.
